

ODBC Database Connectivity for LIBPF

the C++ Library for Process Flowsheeting

LIBPF is a tool to rapidly prototype and deploy small-footprint custom applications implementing computations for training, process engineer support, on-line process diagnostic, data reconciliation.

The LIBPF **ODBC** (Open Data Base Connectivity) product adds to LIBPF CORE desktop and enterprise database connectivity.

Supported database engines

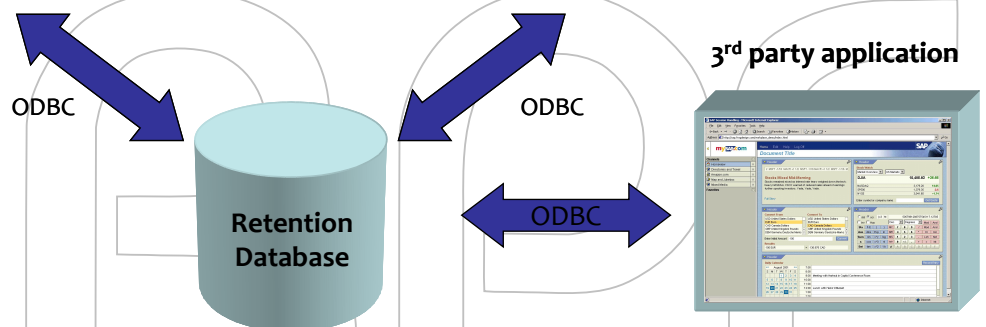

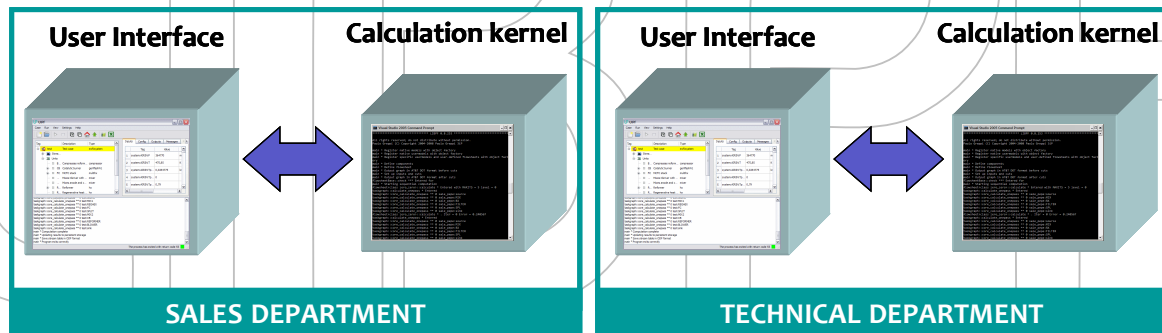

Microsoft Access

Microsoft SQL Server

Oracle Database 10g Express Edition

postgresql via unixodbc

... any database with an ODBC 3 driver on your platform
